15. If more than one bid is offered by any one party for the same product, by or in the name of his clerk, partner, or other person, all such bids will be rejected. A party who has quoted prices to a bidder is not thereby disqualified from quoting prices to other bidders, or from submitting a bid directly for the work.
16. The MOA may reject any unbalanced bid if it is in the best interest of the MOA. A bid is considered unbalanced, when in the opinion of the Purchasing Director, the bid allocates a disproportionate share of costs to one or more bid items and reduces the costs of another bid item or items, and if there is a reasonable possibility that the bid will not result in the lowest overall cost to the MOA.
17. When the Bidding Documents contain a basic bid and additive alternates, the low Bidder will be determined by the lowest combination of the basic bid and as many additive alternates as may be chosen in the order listed in the Bid. The Purchasing Director may bypass any additive alternate whose selection would cause the Contract to exceed the funds available.
18. The Purchasing Director will use the list of priorities in the bid schedule to determine the low bidder only. After determining the low bidder, an award may be made on any combination of the bid items provided: (1) it is in the best interest of the MOA; (2) funds are available at the time of award; and (3) the low bidder's price for the combination to be awarded is less than the price offered by any other responsive, responsible bidder.
19. The MOA standard payment terms are NET 30. Bidders may offer discounts for prompt payment. The minimum prompt payment terms acceptable to the MOA is 1% and net 15 days. Prompt payment terms will be utilized to determine final net price offered. Any prompt payment terms lower than 1% and net 15 will result in payment terms of NET 30. If bid includes prompt payment terms, bidder will include payment terms on the Bid Proposal Page. **NOTE: The prompt payment period will commence upon receipt and acceptance of the supply/service or receipt of a valid invoice; whichever occurs last.**

It is anticipated that the product lines will be commissioned independently due to the various constraints including vessel schedules and availability of specific products. The Contractor may use the crane at the

PCT on the hose tower, but contractor will be responsible for operating the crane safety and provide the personal need to operate the crane.

After given Notice to Proceed by the POA, the Contractor shall commence with work required under Schedule A: Strainer Installation as outlined below.

1. Install energy isolation at POAVY and PCT per POA and Contractor procedures.
2. Unbolt and remove POAVY plug valves.
 - a. Install spill containment under flanges and have vacuum truck available for use prior to opening flanges at five locations: valves V5012/6012/7012/8012, and motor-operated valves (MOV) MOV-111 (or upstream pipe spool).
 - b. Valves are 12" Class 150 Western Valve DAN-EX reduced port plug valves, approximately 890 lbs. each, installed in a horizontal orientation. Refer to Western Valve Installation, Operation, and Maintenance (IOM) manual in Section XII, Supporting Documentation, for additional information.
3. Install basket strainers in the upstream flange set at each location. Refer to Hendrix Specialty Fabrication Installation, Maintenance, and Spare Parts
4. Reinstall POAVY plug valves at all five locations.
5. Remove energy isolation.

After given Notice to Proceed by the POA, the Contractor shall commence with work required under Schedule B: Sweep and Soak Test, Fuel Testing and Tank Gauging as outlined below. Schedule B work will require coordination with the POA to schedule work appropriately with other operations at the POAVY.

1. Contractor will berth vessel at PCT and connect vessel to berthing line to POAVY.
2. Contractor will gauge vessel tank and terminal tank.
3. Contractor will sample and test fuel from vessel according to API RP 1595 Table 1, or according to product specification if non-aviation product is used. If product from vessel meets specification, the unloading operation may proceed.
4. Contractor will open manual valves on PCT berthing line, MOV and User main manifold valve at POAVY, and appropriate User valves to line up flow to terminal tank.
5. Contractor will pump product from vessel into PCT berthing line. Product volume pumped into line should be at least the volume of the berthing line, not to exceed 900 barrels (37,800 gallons) without additional approval by POA.
6. User will close manual valves on PCT berthing line, MOV and User main manifold valve at POAVY, and appropriate User valves.
7. Contractor will gauge vessel tank and terminal tank.
8. Contractor will pull and test pre-soak sample from berthing line according to API RP 1595 Table 1, or according to product specification if non-aviation product is used. Sample point should be 3/4" vent near MOV at POAVY, or alternative point on User piping at POAVY.

9. Soak test shall be conducted by holding product in berthing line for 4 days to meet requirements of API RP 1595 paragraph 5.3.2.6 and Table 2.
10. After completion of soak test, Contractor will pull and test post-soak sample from berthing line according to API RP 1595 Table 1, or according to product specification if non-aviation product is used. Sample point should be 3/4" vent near MOV at POAVY, or alternative point on User piping at POAVY.
 - a. If product from line meets specification, the PCT berthing line has been successfully commissioned and will be considered ready for normal operation.
 - b. If product from line does not meet specification, repeat the procedure for the soak test per API RP 1595 paragraph 5.3.2.6.

Upon successful commissioning of the product lines and after given Notice to Proceed by the POA, Contractor shall commence with work required under Schedule C: Strainer Removal as outlined below.

1. The Contractor shall schedule the date and time of strainer removal with POA at least 48 hours prior to initiating the work to allow POA to provide Users with at least 24 hours notification, so strainer removal and cleanout can be witnessed.
2. Install energy isolation at POAVY and PCT per POA and Contractor procedures.
