-------------	------------	--------

Invoice Description:
 Found the hot water boiler calling for heat with no ignition - Tested all controls and safeties - Found the flow switch not closing circuit - Tested flow, good - Suspect a failed or failing flow switch. Turned power and water off to the boiler - Removed and replaced the flow switch - Set switch parameters - Restored power and water - Tested and cycled the hot water boiler; unit is properly working at this time

Technician Name: Stewart Nagel
